

## UNDERSTANDING

# EIFFEL LIMESTONE

Perfect for creating an authentic aged effect underfoot, our Eiffel Limestone in a Tumbled Finish is a beautiful natural limestone with subtle colour variation throughout. It's ideal for classically styled kitchens, hallways, utility areas and boot rooms, complementing painted timber cabinetry and traditional interiors.

We want you to be aware of some points to consider when you receive your delivery, prior to installation.

Eiffel Limestone contains charcoal as an inherent hue, giving the surface its black veined pattern and linear markings, which simply add to its character. These colourings may make the stone appear cloudy or blotchy in areas.

As a natural material, subtle colour variation is to be expected. The stone may also feature linear markings. We recommend using Stain Block Eco with this product to allow it to breathe, as it contains fissures and is sensitive to atmospheric conditions.

To preserve the look of your stone, we recommend using:

- Rapid or Semi-Rapid Set Stone Adhesive
- Stain Block Eco
