

UNDERSTANDING

ORNAMENTO CUSTOMISABLE COMPOSITE TILE TRIMS

Proudly made in the UK, these trims are crafted from a premium wood and resin composite, offering exceptional versatility and durability. Paintable, stainable, easy to cut, and flexible, they are also water and weatherproof making them ideal for both indoor and outdoor use.

Our selection of stunning profiles provides an elevated finish to tile edges, ensuring a stylish touch to any space. Please note, while the composite material is resistant to water and weather, this does not apply to any finishes applied during painting or staining, please refer to the manufacturer's coating guidelines for the best finish for the proposed application.

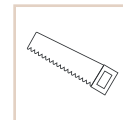

CUTTING

Cut using woodworking tools.

POWERED SAW

HAND SAW

BREAKAGES? MATERIAL CHIPPING?

Cut slowly with a fine tooth blade, at room temperature.

CURVED SURFACE?

Strip mouldings can be gently warmed and applied to your curve. Thinner mouldings will flex more.

FIXING

Similar fixing to wooden product.

PINNED

Warm product and use a very fine headless pin gun.

SCREWED

Predrill and countersink hole. After fixing, apply wood filler to hole and sand smooth before finishing.

GLUED

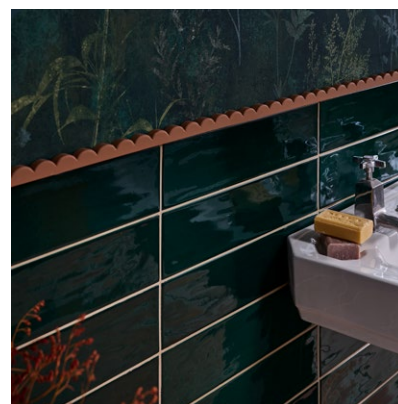

Virtually all glues - including panel adhesives, wood glues, super glues. Support items whilst curing and follow adhesive manufacturer's instructions.

BENEFITS

- Better to finish than a wooden product.
- No/Minimal surface prep required. Occasionally a light rub back with paint prep pads.
- No priming required
 - unless in more demanding applications where we recommend wood primer.
- No sealing required.

NOTE: Keep mouldings flat to prevent warping. If required they can be laid flat to return to original state, without affecting use or durability.

FINISHING

Types of finish:

PAINT - SPRAY

All standard paints inc. wood, wall and specialist paints.

PAINT - BY HAND

All standard paints inc. wood, wall and specialist paints.

STAIN

Use solvent based stains. Particularly effective on mouldings that have woodgrain.
